

GoRoute

Route Accounting Software

Route Delivery Accounting from GoRoute

Improve Route Efficiency, Increase Profits -- Reduce Overhead and Errors.

GoRoute! Key Features

- Enter orders, pre-orders, returns and damaged items.
- Price items by item group, customer, with special pricing and promotional price schedules.
- Account for all cash, check and charges made during the day.
- Perform end-of-day accounting functions to accurately close out your delivery day.

With years of leadership in the route accounting field, GoRoute, Inc. understands that every company has unique route accounting needs.

GoRoute is a flexible software package that is ready to use or can be customized for your business.

GoRoute Standard Software

GoRoute comes standard with software components you need to build

a complete route accounting solution.

Powerful Handheld Applications

GoRoute's handheld software provides all the standard route accounting functions needed in the field, including:

- Invoicing of new, cash, direct-billed, and many other customers.
- Product returns
- Promotions for specific customers or products
- Invoice, settlement, returns, and inventory reports
- Accounts receivable reporting
- Order entry and processing
- Inventory quantities or adjustments.

GoRoute also includes an easy-to-use communications module that can transfer data either locally or remotely, completely unattended.

Sophisticated GoRoute Modules

To customize your route accounting application, you can select from many optional capabilities. These capabilities include:

- DEX/UCS for on-site transfer of invoices
- Specialized invoicing and reporting functions such as sales history, invoice spooling, and return pricing

computation.

- Sophisticated communications options, including cellular or wireless communications support.

A Complete Solution

With GoRoute's powerful standard features and optional capabilities, you can design a route accounting solution that will let you get IT right, both now and in the future.

Route Modules *(continued from page 1)*

Detail Functionality

Some of the detailed functionality includes the following:

Easy to Use Invoicing/Order Entry

- Invoicing of centrally billed customers
 - Cash and credit customers
 - Product selection using barcodes
 - Product selection by category, item number
 - Item search by item number, or description

Extensive Pricing Flexibility

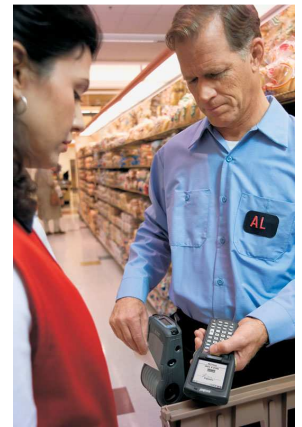

- Flexible pricing structure including:
 - **Base prices**
 - **Special and promotional pricing**
 - **Discounting** by item, groups of items or total invoice
 - Automatically Apply a surcharge (fuel, delivery, etc) if desired
- Signature capture directly on handheld unit and transfer to host
- Return product management

Accurate Inventory Management

- Inventory management maintains truck stock and accounts for all items issued, transferred or adjusted.
 - **Load, Transfer, Adjust Transactions** allow driver to keep truck stock levels up to date. Load sheets are printed and can be signed by both the driver and warehouse supervisor.
 - **Route Orders** allow drivers to create load requests for a future date. This information is transferred to the host, adjusted for availability and staged when needed.
 - **Physical count** capability provides the driver with the ability to generate a physical truck count when needed.

Useful and Timely Reports

- Reports include (partial list):
 - Customers to visit
 - Full Day End Settlement Reporting
 - Customers visited

Did you know that GoRoute allows you to print receipts at the point of entry, eliminating the need for the driver to make extra trips to his vehicle.

GoRoute supports many handheld styles including the MC70 rugged handheld from Motorola.

GoRoute can be used with the O'Neil line of rugged printers.

The PrintPad[™] printer allows you to slide the handheld into a print sled, thus integrating the printer and handheld into a single unit.
